

# INVENTORY RECORD ACCURACY PROJECT

**Case Study:** Warehouse – Global Makeup Manufacturer

A global makeup manufacturer required a **warehouse stocktake** due to being unsure and **unaware of stock levels** within the warehouse

# INVENTORY RECORD ACCURACY PROJECT

## Case Study: Warehouse – Global Makeup Manufacturer

A global makeup manufacturer that has 36 different brands, with a presence in 150 countries and 88,000 employees required the support of RGIS. Creating and producing cosmetics at a local level, so that the formulations are perfectly adapted to the needs of the consumers, wherever they live. To achieve that, developed a worldwide network of research, innovation and marketing hubs, one for each of the strategic markets in the United States, Japan, Brazil, China, India and South Africa.

### REQUIREMENT

A global makeup manufacturer required an accurate **warehouse stocktake** because:

- The customer was **unsure and unaware of stock levels**
- Consignments going in and out of the warehouse were **unchecked**
- Stock levels being undetermined were **impacting profitability**
- Stock levels being unknown were **impacting availability within stores**

### SOLUTION

The global makeup manufacturer partnered with RGIS to complete the **wall-to-wall warehouse stocktake**, and provided the following:

- Provided a team of **experienced RGIS auditors**
- Exact stock numbers were **identified**
- Ensured the customer did not have **excess stock levels** in any product lines
- Established whether the customer was running at **low stock levels** for any product lines

### RESULTS

The global makeup manufacturer found by outsourcing the **wall-to-wall warehouse stocktake** to RGIS, the following was achieved:

- **All cages were counted** within the warehouses
- Identified that testers and samples were in excess of the stock items expected. Which meant the manufacturer was able to **redistribute the testers and samples to stores**
- The global makeup manufacturer **saved in excess of £30,000** as the customer did not need to reorder stock for over eight months

By partnering with RGIS, the global makeup manufacturer **achieved a saving in excess of £30,000**, as stock did not need to be reordered for over eight months
