RETAIL STORES AND WAREHOUSE STOCK COUNTS

Case Study: Retail Inventory – Lifestyle Brand Retailer

A Brazilian lifestyle brand retailer that produces luxury clothing, footwear and accessories, required the support of RGIS. With more than 80 stores and franchises across Brazil and also has stores in Italy, USA, Japan, Uruguay and Greece.

REQUIREMENT

The lifestyle brand retailer needed a solution to **count both retail stores and warehouse** with the same accuracy and transparency, so required RGIS to provide the following:

- **Wall-to-wall warehouse count**
- **Count all stock in stores**, including back rooms and shop fronts
- **Accuracy** to be a priority
- **Consistent and transparent reporting** for both warehouse and stores

SOLUTION

The lifestyle brand retailer partnered with RGIS to complete the **store and warehouse complete stock count project**, and provided the following:

- Scheduled teams of two to three **experienced RGIS auditors** per store
- A team of **40 experienced RGIS auditors** were put together for the warehouse count
- Warehouse team **scheduled for two days**
- **Variances** to be checked in both stores and warehouse
- **Consistent reporting** across all locations

RESULTS

The lifestyle brand retailer found by outsourcing the **store and warehouse complete stock count project** to RGIS, the following results were achieved:

- Average of **2,000 stock items accurately counted** per store
- **200,000 stock items were accurately counted** within the warehouse
- **Variances checked** and reported
- The customer found that the **cost of completing inventories was reduced**

By partnering with RGIS, the lifestyle brand retailer found that the **cost of completing inventories was significantly reduced**
