

THIRD PARTY LOGISTICS DISTRIBUTION CENTRE WAREHOUSE COUNT

Case Study: Logistics Centre – Warehouse

A distribution centre with two additional off-site third party logistics facilities required a **full warehouse inventory**

THIRD PARTY LOGISTICS DISTRIBUTION CENTRE WAREHOUSE COUNT

Case Study: Logistics Centre – Warehouse

A third party logistics (3PL) distribution centre that offers real-time order and shipping updates with fast international shipping, required the support of RGIS. The company has a fully branded order fulfilment and robust data security to protect customer information.

REQUIREMENT

The distribution centre with two additional off-site 3PL facilities needed a **full warehouse inventory**. The customer had encountered **accuracy problems and needed the issues resolved** with as little downtime as possible.

The 3PL distribution centre required RGIS to provide the following:

- All **three locations needed to be audited** over one weekend, to limit disruptions to the business and orders going out
- **Experience** of large distribution centre environments was vital
- **Accuracy** to be the number one priority

SOLUTION

The 3PL distribution centre partnered with RGIS to complete the **distribution centre inventory counts project**, and RGIS provided the following:

- Completed a **site assessment at each location**
- RGIS created an **efficient inventory program** specific to the distribution centres
- Due to the size of the facilities, the ability to quickly bring in **additional local RGIS inventory auditors** for this event was considered a key element
- Over the course of three days with several shifts per day, **40 to 75 experienced RGIS auditors inventoried the contents of the warehouses**, and additional experienced RGIS auditors were also on-hand if required
- RGIS teams used **wireless scanners to count** all items quickly and efficiently
- The inventory **data was electronically returned** to the customer at the close of the event

RESULTS

The 3PL distribution centre found by outsourcing the **distribution centre inventory counts project** to RGIS, the following results were achieved:

- The process did not disrupt regular business in any of the three locations due to scheduling
- **Full wall-to-wall inventories** were completed at the distribution centre, as well as the two 3PL locations during a single weekend
- The distribution centre was able to **resume normal business operations** with an **up-to-date and accurate inventory**

By partnering with RGIS, the 3PL distribution centre was able to **resume normal business operations with an up-to-date and accurate inventory**
